

YOUR PET'S BEEN SPRAYED BY A SKUNK. NOW WHAT?

Follow these six steps to remove the oils and odor

WHAT YOU'LL NEED

- 1 Quart 3% Hydrogen Peroxide
- 1/4 cup Baking Soda
- 1-2 teaspoons of gentle dishwashing liquid, i.e. Dawn
- Pet Shampoo
- Water
- Rubber Gloves

OTHER TIPS

Keep your pet outside as the oils from the skunk's spray can be difficult to remove from fabric.

DO NOT make the mixture ahead of time or store in a closed container, as this may result in an explosive chemical reaction.

PROCEDURE

- 01** If your pet was sprayed in the face, begin by gently rinsing their eyes with cool water to remove the oils.
- 02** Mix the Hydrogen Peroxide, Baking Soda, and Dishwashing Liquid in a bowl.
- 03** While wearing rubber gloves, lather the mixture throughout the skunked area on your pet.
- 04** Being careful to avoid the eyes, rinse thoroughly with warm water after about five minutes.
- 05** Next, wash your pet thoroughly with a pet shampoo.
- 06** Towel dry your pet and let them finish drying in a warm area.
